BILLS MAY BE PAID AT ANY OFFICE OF THE COMPANY
OFFICE HOURS—8.30 A. M. TO 5 P. M. SATURDAYS, 8.30 A. M. TO 12 NOON

MRS. EFFA MANLEY, PUB. LTC.

G

15-12 233 W. QUEEN LANE,
787

I'll serve you ice
water, as well
as hot water!
Both cheap!

THE MONTHLY RATE STEPS
HAVE BEEN ADJUSTED
TO A PERIOD OF

.....2.....MONTHS.....DAYS

See reverse side for Rates and Service Codes

ELECTRIC RATE

CODE EC GENERAL LIGHT AND POWER. RATE GLP

Rate Table Monthly Basis.

\$1.00 per K.W. of demand, which includes the first 10 hours' use of the demand.

4½c per K.W. hr. for any part of the next 80 hours' use of the demand.

1.8c per K.W. hr. for any part of the next 100 hours' use of the demand.

1.6c per K.W. hr. for the excess use.

The demand for the first block of the rate shall be not less than one Kilowatt.

Quantity Discount on Charges at the Above Rates.

No Discount on the first \$10.00

10% " " any part of the next.... 40.00

20% " " the excess over..... 50.00

Discounts shall be limited so as not to reduce any bill below the minimum charge.

Determination of Demand.

The demand shall be the arithmetical sum of any assessed and/or measured demands combined under this rate, computed to the nearest 0.1 K.W., but not less than 0.5 K.W.

Assessed Demand. Shall be taken at the following percentages of the connected load in K.W.

Lighting Load—70% Appliance Load—40% Cooking Load—20%.

Power Load—85% of the 1st 10 K.W., plus 55% of the excess over 10 K.W.

Residence Load—0.4 K.W. for that part of the connected load which would comply with the availability intent of the residence rate where not more than 10 units are served.

Measured Demand. Any customer may have the demand measured, instead of assessed as provided above, by written request that a demand meter be installed for a period of not less than one year.

Minimum Charge.

\$1.00 per month per kilowatt of billing demand, but not less than \$1.00 for single-phase service nor \$3.00 for polyphase service.

The billing demand, where measured, shall be not less in any month than 60% of the greatest demand of the preceding 11 months.

The two factors used in calculating this bill are the "Kilowatt Demand" and "Kilowatt Hours" as shown on the face of the bill.

Example:

Kilowatt Demand 7.5—Use 1600 K.W. Hrs.

7.5 × 10 = 75 for \$7.50

7.5 × 80 = 600 × 4½c 27.00

7.5 × 100 = 750 × 1.8c 13.50

Excess = 175 × 1.6c 2.80

1600 Gross \$50.80

No discount first \$10.00

10% × \$40.00 = \$4.00

20% × .80 = .16

Total quantity discount \$4.16

Net Bill \$46.64
